INDEX.

ABERDEEN Hammermen's Exhibition, 295
Absolute resistance of mercury, by R. T. Glazebrooke, 340
Accident at Blackpool, 70
„ Brighton electric light wire, 16
„ electric fire, at Paris, 367
„ Fatal electric tram, 355
„ Florence electric tram, 383
„ at a Paris lighting station, 495
Accidents, Fatal electrical, 272
„ from electric currents, Prevention of, 287
„ Railway, for 1889, 353
Account of some experiments upon the application of electrical endosmose to the treatment of gouty concretion, by Thos. A. Edison, 213
Accumulator explosions, 498, 529
„ traction, 5, 56, 703
„ „ in Australia, Failure of, 626
„ „ Cost of, 37, 271
„ „ in Paris, 591
„ tramcars, 320
Accumulators, Management of, Part IV., 8
„ in telegraphy, 271
„ Tudor, 463
Accurate measurements of low resistances 12
Acknowledgment, 237
Action of lightning on the human organism, 77 ...
Adjustable telephone transmitter, 87
Adoption of the electric light at Barnsley, 127
Advance in rubber, 401
Advantages of technical education, 431
Advertising, Electricity and, 243
Advertisement—*fin de Siècle*, 575
Advice gratis, 528
African telegraph service, 368
Agricultural show, Royal, 21
Air condensers of the British Association, by R. T. Glazebrook, 391
„ Electrical conductivity of, and the formation of ozone, 60
Alloys of nickel and iron magnets, Properties of, 163
Alternate current machines, Method of synchronising, 148
„ „ motor, 76
„ currents, Anti-effective copper in parallel or coiled conductors for, by Sir W. Thomson, 308
„ „ in parallel conductors of homogeneous or heterogeneous substance, by Sir W. Thomson, 314
Alternating *v.* continuous currents in relation to the human body, by H. N. Lawrence and A. Harries, 301, 344
„ current experiment, 242
„ „ lighting in Baltimore, 530
„ „ motor, 76
„ currents, doomed, 216
„ „ Properties of, 640
„ „ Some points about, 120
„ motors, Tesla's new, 207
„ system in Russia, 45
„ transformer system in South America, 611
Alternative path experiments, by Dr. Oliver Lodge, 90
„ „ Prof. Lodge's communication, &c., by S.A. Varley, 122, 172
Alternator, Elihu Thomson's new, 176
„ An historical, 210
„ Yet another, 231
Aluminium Company, 296
Amalgams, Certain behaviour of, 623
Amendment, The Hopkinson, 259
America, Taking the lead of, 30
„ Manufacture of cables in, 158
„ (North) electric lighting statistics, 217
„ Strike in, 241
„ Western Gas Association of, 45
American Association for the Advancement of Science, 336
„ company dividend, 721
„ eagle, 95
„ „ on the wing, 641
„ electric transit statistics, 334
„ Patent Office, 159
„ promptness, 187
„ theatre lighting, 270
Americans, What they say, 158
Annealing of copper, The, 272
„ „ by G. Wickoff Cummings, 277
Another fatal shock, 431
Anticosti cable, 400
Apparatus for examining the variation of electromotive force with temperature, 521
Applied classics, 658
Appointment, Mr. A. R. Bennett, 156, 186
„ Mr. E. A. O'Keeffe, B.E., 334
Arc lamp tablets, Wade's patent, 369
„ lamps, Improvement in, 115

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE, LEEDS, 1890:—
Abstract of address, by Sir F. Abel, 281
Alternate currents in parallel conductors of homogeneous or heterogeneous substances, by Sir William Thomson, 314

BRITISH ASSOCIATION—*continued.*
Alternating *versus* continuous currents in relation to the human body, by H. N. Lawrence and A. Harries, 301
Anti-effective copper in parallel conductors, by Sir William Thomson, 308
Character of steel used for permanent magnets, by W. H. Preece, 305
Compensation of alternating current meters, by J. Swinburne, 506
Column printing telegraph, by F. Higgins, 348
Discussion on the report of the committee on standards, 426
Discussion on alternating currents in relation to the human body and fire insurance rules, 344
„ on Testing iron, 346
Effect of oxidation on the magnetic properties of manganese steel, by O. T. O'Shea, 346
Electric lighting and fire insurance rules, by Wilson Hartnell, 299
Electrostatic force between conductors conveying steady or transient currents, by Dr. Oliver Lodge, 426
Experiments to determine wave velocity in certain dielectrics, by F. T. Troughton, 526
Form of submarine cables for long distance telephony, by W. H. Preece, 309
Illustration of contact electricity presented by the multicellular electrometer, by Sir William Thomson, 303
Lineff electric tramway, by Gisbert Kapp, 347
Notes on high vacua, by J. Swinburne, 505
Recent determinations of the absolute resistance of mercury, by R. T. Glazebrook, 340
Secondary cells, by W. J. S. Barber Starkey, 304
Suggestions towards the determination of the ohm, by J. V. Jones, 311
Testing iron, by J. Swinburne and W. F. Bourne, 345
The air condensers of, by R. T. Glazebrook, 391
Thomson's, Sir W., new electricity meter, 423
Value of certain standard resistance coils, by R. T. Glazebrook, 424
Broker's view, 703
Bromley electric lighting, 156
Brooks, David, on liquid insulation for underground conductors, 366
Browett, Lindley & Co., Limited, 754
Brush *v.* King, Brown and Co., 143
Buda-Pest electric tramway, 58
Buller, Jobson & Co., Limited, 402
Bull ring of the Rue Pergolese, 585
Burnand's new burlesque, 5
Burton backward, 294
Business extension, 295, 465
„ men interviewed, 5
„ mention, 464

CABLE AND CABLES—
Account of a cable expedition, 431
across the North Sea, 658
Another Franco-Danish, 625
Anticosti, 400, 432
Argentine, 528
„ European, 617
Australian, 334, 668
Bahamas, 511
Bermuda, 70
Bermudas-Halifax, 244, 248
